EDUCATION

University of California Santa Barbara
Bachelor of Science (B.S.) Computer Science

Expected Graduation June, 2027
Santa Barbara, CA

- 3.98 GPA
- Dean's List Every Quarter

Relevant Coursework

- Automata and Formal Languages
- Data Structures and Algorithms

WORK EXPERIENCE

Portola Dining Commons
Student Worker

April 2024 – June, 2024
Goleta, CA

- Collaborated with staff to efficiently operate all jobs and helped efficiently train 4 new employees.
- Adapted to a high pressure situation during a special lunch service where the dishwasher broke, would efficiently and independently dispose of paper dishes to maintain cleanliness and a seamless customer experience.

UCSB CS Department
Undergraduate Learning Assistant

March 2026 – June, 2026
Santa Barbara, CA

- Mentored students during weekly office hours on complex topics and problem-solving techniques, reducing common errors and misunderstandings in projects and homework assignments.
- Collaborated with the Professor and TAs to refine and develop course homework and programming assignments.
- Delivered student centered feedback to the Professor on course content and assignments, improving experience for students.
- Designed and co-led a comprehensive midterm review session in collaboration with fellow ULAs, that helped prepare students.

PROJECTS

Image Translator App (<https://github.com/Makkerel/Python-Tesseract-Test>)

- Built a desktop app with **Python**, **Tkinter** and **Tesseract** OCR engine that streamlined translation of text in images.
- Implemented a text-highlighting feature with **OpenCV** and **NumPy** to visualize detected text areas.

Housing App (<https://github.com/youwen5/gauchohousing>)

- **SvelteKit** full stack component in frontend using the **Google Maps API** to geocode housing data.
- Utilized **Selenium** powered web scraper to harvest housing data for processing that is then served by a **REST API** on a **Django Backend Server**.
- Won award at [SB Hacks XI](#)

Virion (<https://github.com/youwen5/virion>)

- Simulated avian flu spread in US based on known government data through the use of an **SEIR** model
- Used **Svelte** to model the data in 3D over time.
- Won award at [Data Orbit 2025](#)

SKILLS

Spoken Language: English(Fluent), Mandarin(Spoken)

Programming Languages: Python, C++, C, Java

Software: Git, CMake, Visual Studio 2022, Visual Studio Code, Vim

Libraries: WxWidgets, Numpy
